

Flexmonster Pivot Table & Charts

Unlimited Distribution License

Embed a powerful pivot table solution in your web application and help your customers make the most of their data

Greetings

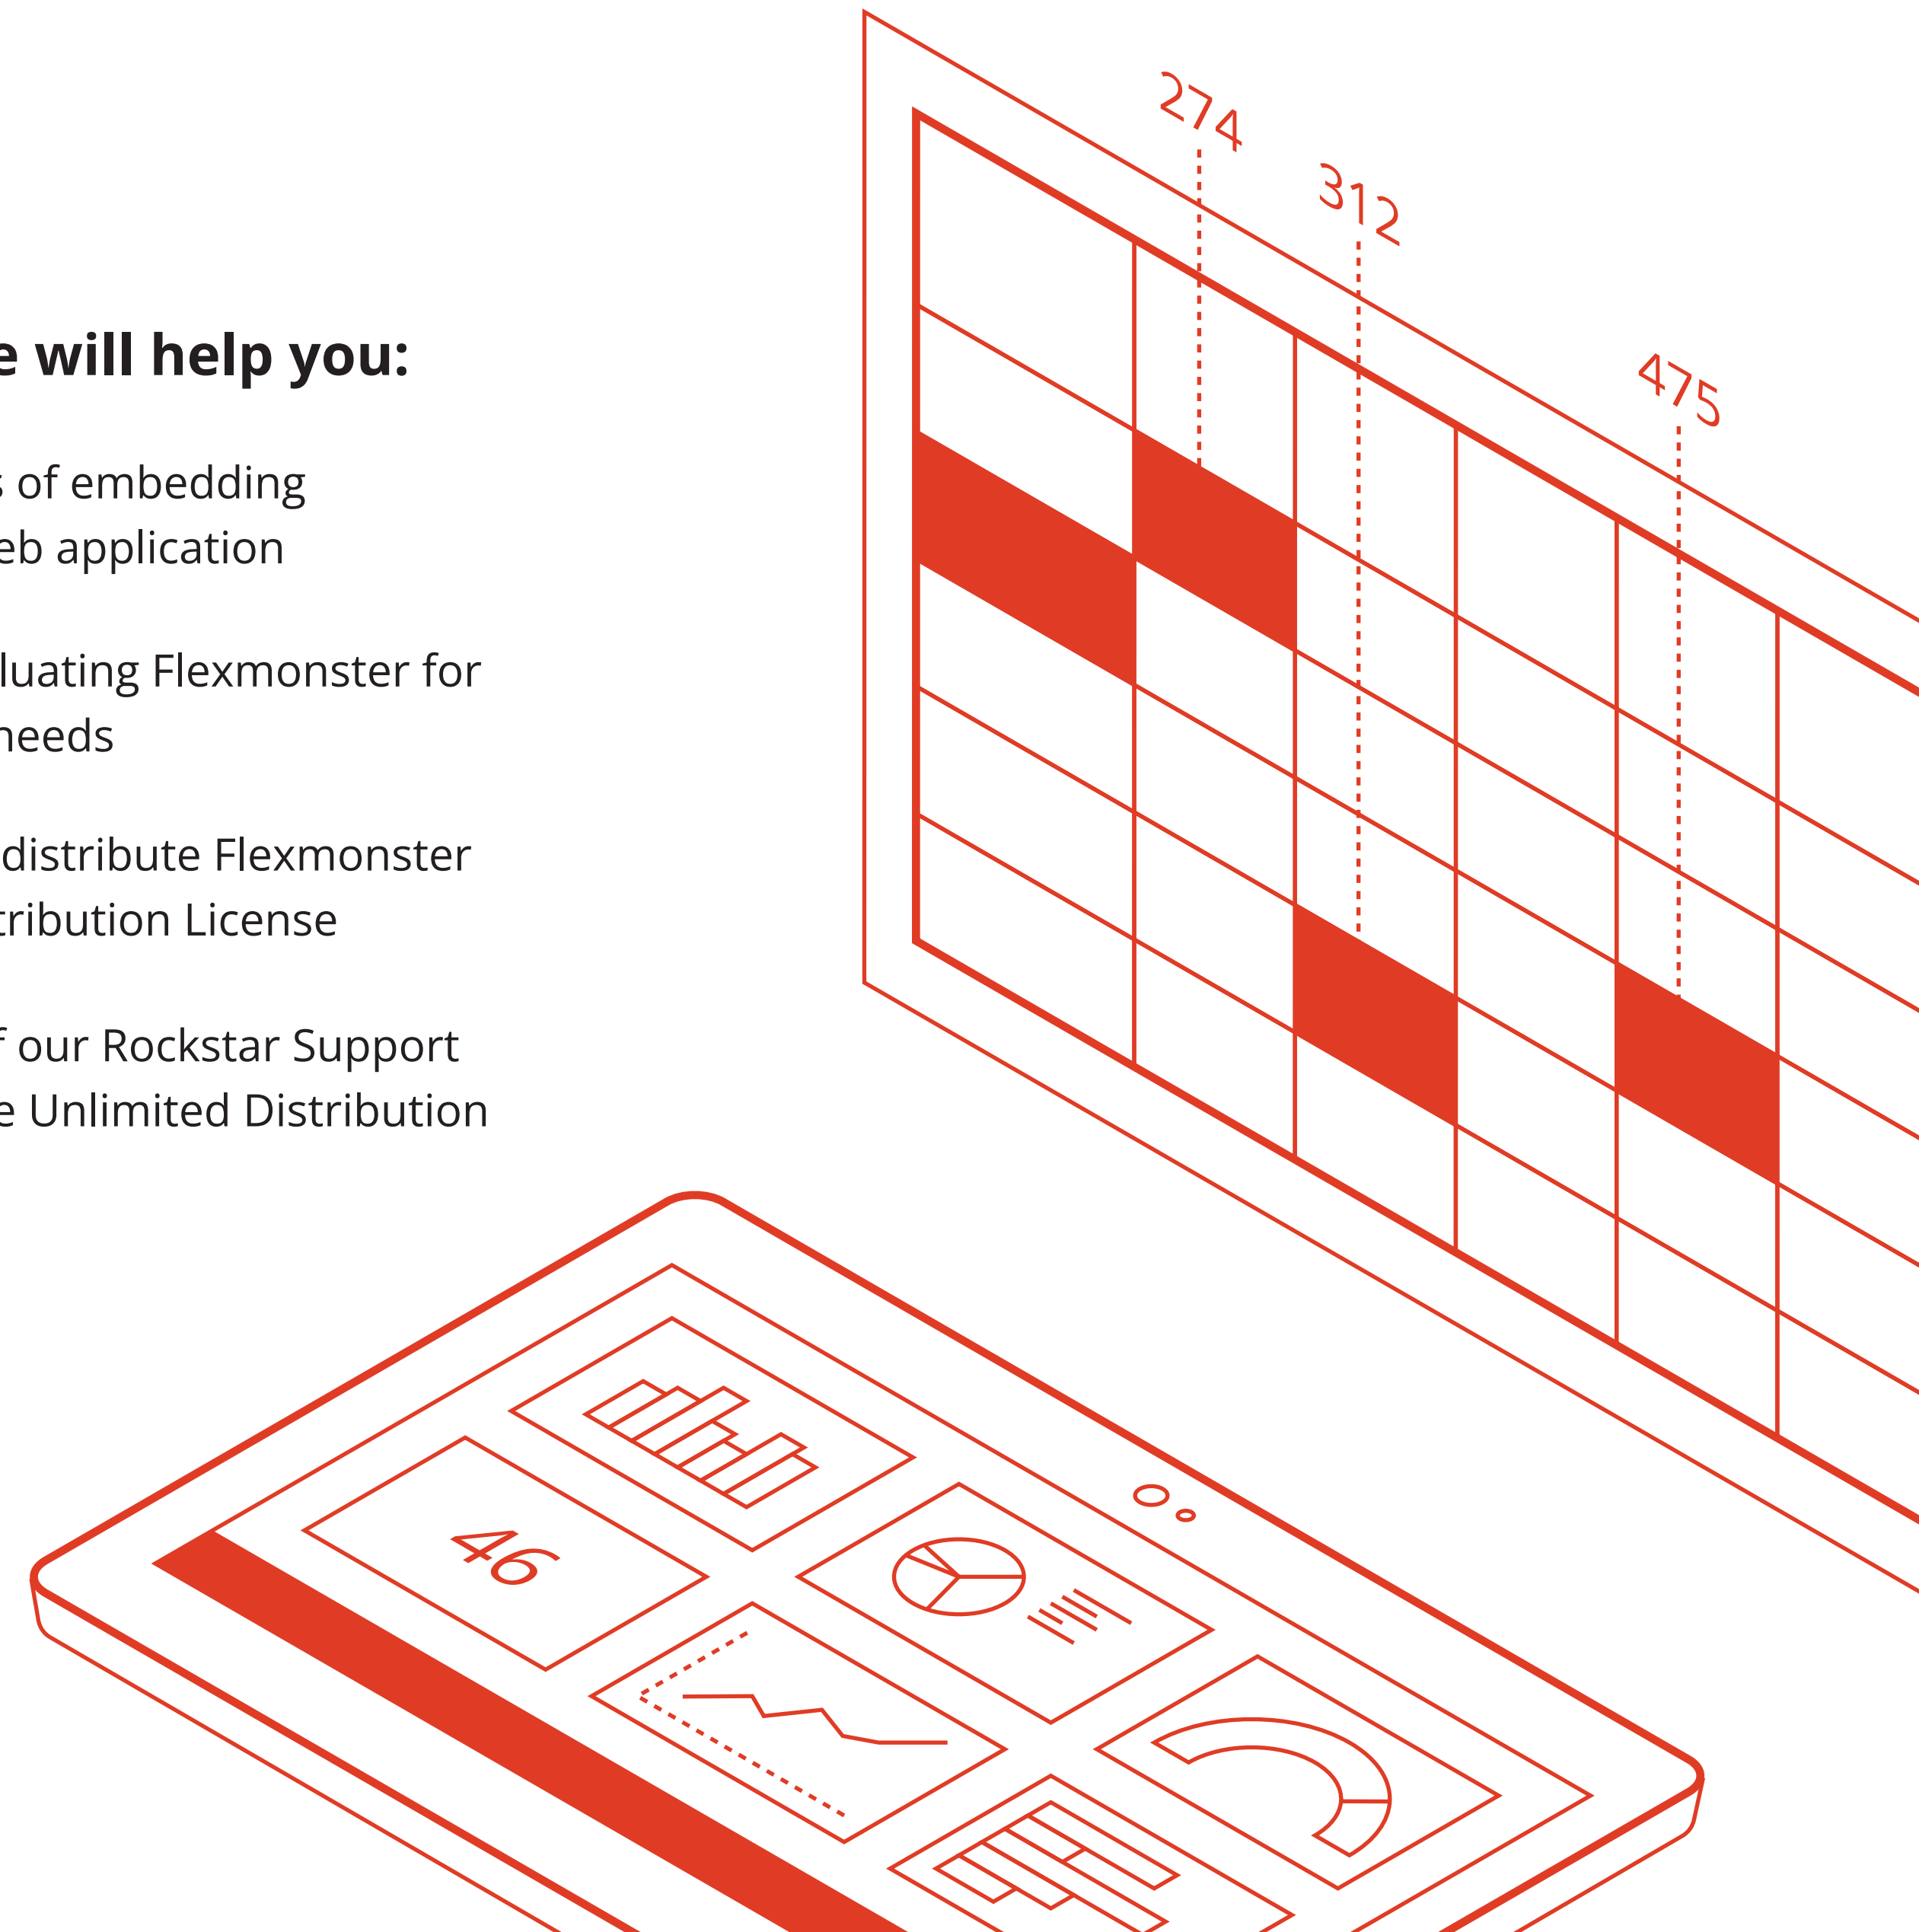

We know that your data can hide much more than you can imagine. Flexmonster can reveal whatever might be hiding in your data and make it available for review, analysis and conclusions.

Flexmonster is a JavaScript pivot table and charts component. It empowers your application with immersive data reporting capabilities, combining both the power of desktop software and the flexibility and scalability of a web component. Flexmonster is an invaluable tool for everyone from business analysts and sales managers to financial experts and data scholars.

The Unlimited Distribution License is our most comprehensive license. It gives you the freedom to embed Flexmonster in your application and deploy it however you want, from single-tenant on-premises environments to cloud and multi-tenant platforms.

Let's get started! We will help you:

- 1 **Understand** the basics of embedding Flexmonster in your web application
- 2 **Learn more** about evaluating Flexmonster for your project's specific needs
- 3 **Discover** how you can distribute Flexmonster with the Unlimited Distribution License
- 4 **Explore** the benefits of our Rockstar Support which accompanies the Unlimited Distribution License
- 5 **Determine** pricing

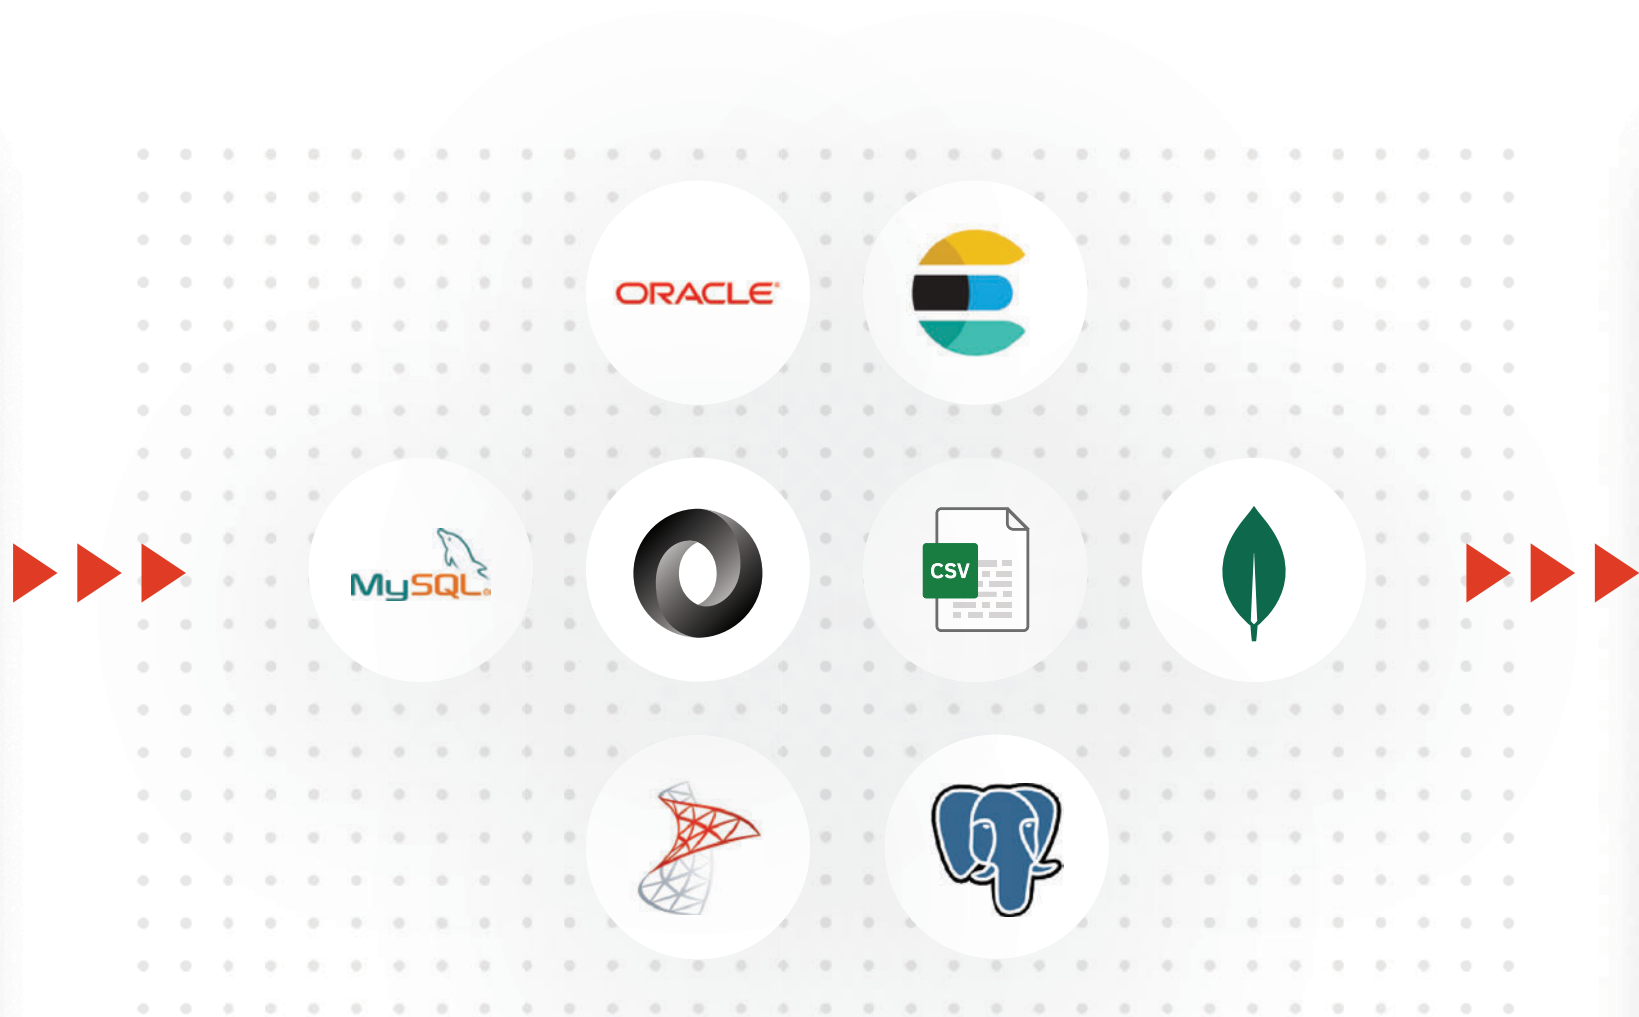

Start As Simple As One-Two-Three

Any developer can insert the interactive pivot report into your application in less than 15 minutes.

1 Integrate JavaScript library using a few lines of code

```
1 <script>
2   new Flexmonster({
3     container: "pivot-container-id",
4     toolbar: true,
5     report: {
6       dataSource: {
7         filename: "path.to.data"
8       }
9     }
10  });
11 </script>
```

2 Connect your data source

3 Configure and use your reports

	1	2	3	4	5
1		Color			
2	Country	Green	Blue	Red	Pink
3	Canada				
4	Price	174	184	201	105
5	Quantity	22	31	15	23
6	Australia				

That's it! Can't be easier, right?

Designed To Be Easy

Flexmonster was designed with easy integration and flexibility in mind. You can get Flexmonster up and running smoothly and rapidly regardless of the technologies you use.

Well-documented

Everything from quick start and API reference to best practices and advanced techniques is covered in our documentation, help center, blog and video tutorials. It is a powerful knowledge base for developers.

Hundreds of samples

More than 400 ready-to-use code snippets that illustrate the API from the most fundamental to the most complex scenarios are available online on JSFiddle.

Wide variety of data sources

Using popular sources like SQL and NoSQL databases, CSV/JSON files, tabular and multidimensional SSAS cubes, Elasticsearch or any other data source? Flexmonster handles it all.

Any tech stack

Flexmonster integrates smoothly with popular tech stacks.

No server-side technology dependency and no heavy installations.

Customize As Much As You Want

Make Flexmonster look like your own

Customize Flexmonster according to your corporate style guidelines. Use our predefined skins or CSS code to quickly make Flexmonster look and feel like your own application.

Still need more personal and customized logic?

Contact your Customer Service Manager to discuss if the desired feature can be implemented in Flexmonster.

Multilingual support and regional settings

Do your customers speak different languages? No problem! Flexmonster provides built-in localization for many languages and lets you add your own. The component also supports various formats for dates, time, numbers, currencies, etc.

API and component behavior

- Define which features to enable or disable.
- Build your own scenarios around the component.

Extensive API covers every aspect of data presentation.

Evaluate Wisely

Is Flexmonster right for us?

We understand how important it is to test software before purchase to confirm that the product meets your performance standards, feature requirements and is compatible with your design language.

Download a free fully-functional 30-day trial at flexmonster.com/download-page to evaluate Flexmonster yourself and see how it suits your needs.

With Flexmonster you are never on your own

You can rely on our friendly expert assistance during the entire evaluation process. Always feel free to raise a ticket at our Tech support page or contact us at help@flexmonster.com.

Visit our [Help Center](#) for more information.

World-Class Support

Flexmonster's Unlimited Distribution License guarantees the best customer experience with our Rockstar Support. Here are a few ways we do it:

No bots

Forget about indifferent artificial support. We are real people. We care about your experience with Flexmonster.

Quick responses

Our team will process your case in a couple of business days or even less. If you happen to find a bug, we investigate and provide you with an exact fix date without doubts or surprises.

Relevant help

We carefully look into each support ticket, considering your project specifics and needs. Your case will not bounce from one support tier to another – it is assigned straight to the right person.

Tech-savvy team

Our team members have deep hands-on knowledge of Flexmonster and modern tech stacks. Rest assured, you will get expert help from us.

Value And Price

Once and for all

Make a one-time payment to receive the Unlimited Distribution License. You need not worry about license expiration or delays in providing licenses to your customers. Deploy your application with pivot table to your customers on your own schedule and be confident that Flexmonster will work for you forever.

Unlimited in everything

With Flexmonster's Unlimited Distribution License you have no limits whatsoever. Every aspect of your application is covered: unlimited users, servers, developers. With any support request - we are at your service. Experience the benefits of being our most important customer.

The license is yours. What's next?

During your first year using Flexmonster you receive our maintenance program including Support & Updates. Start off smoothly with our guidance and latest updates with our developers ready to step in if you have difficulties. You are welcome to continue with Support & Updates after the first year or use the component independently.

How much does it cost?

Contact us at sales@flexmonster.com. We will immediately provide you with a straightforward quote and answer all your questions.

Get To Know Us

Flexmonster was started in 2008 with a head office in California and a development team in Ukraine.

From the start, our mission was to develop an easily integrated enterprise-level component for effective data analysis. Since then, Flexmonster has become the most powerful JavaScript pivot table solution available.

We have been trusted by hundreds of clients from around the globe, from rapidly growing start-ups to prominent multinationals.
