

This is the code:

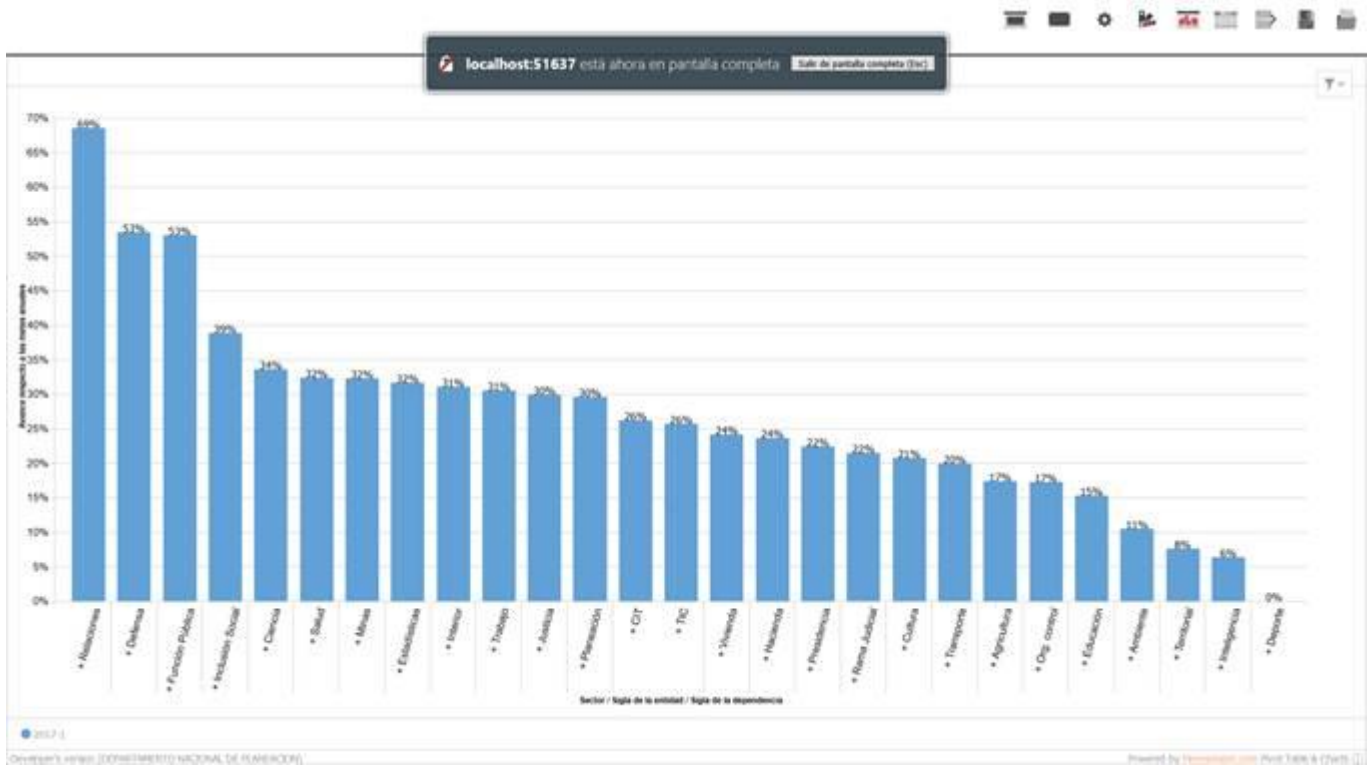

```
if (document["addEventListener"] !== undefined) { // For IE8
  tabs.unshift({
    id: "fm-tab-fullscreen",
    handler: "fullscreenHandler",
    mobile: false,
    icon: customIcons.fullscreen,
    rightGroup: true
  });
}
```

The screen is never re-established.

1. Original.

2. FullScreen

3. I type esc and never adjust.
